A: It's a crack known as "Acro" (or Acrorip). It's a variant of the original Ripsaw project that includes the following: 64-bit support MSI package Windows installer Support for Mac (OSX) and Linux Intelligent 2-pass analysis User-defined custom edge detection filters Automatic multi-core detection Recognition of edge points even when they are not in the 3D data Captures both normal and inverse-depth views Resolution independency ( Up to 512 MB of DDR2/DDR3 memory I hope this helps you. Good luck! Q: Why does my AngularJS code not run in DevTools console? I have been working on an AngularJS project using the sample code at However, when I open up the console for inspecting my code in chrome, the code is not run. From what I could find, there's a bug in Google Chrome with JavaScript - Data Transfer Mode, which is not specific to Angular. Question: Will you know of any workarounds to this problem, or is there a way I can find out the error code in the console so I can use it as an error message? Thanks A: Most likely your scripts are not loaded in the correct order, try the following: Open up console -> right click -> inspect element -> switch to DOM tab -> drag and drop scripts so they are ordered: script1.js, script2.js, script3.js Your code should run now. If this does not work let us know and I will try to get
